

DELIVER REMARKABLE OUTCOMES AT THE EDGE

Act on data near its point of creation to generate immediate, essential value for your enterprise.

AT THE EDGE

15B
IOT DEVICES

connected to enterprise infrastructure by 2029¹

50%
OF LARGE ENTERPRISES

will have a documented edge computing strategy by year end of 2023, compared to less than 5% in 2020³

73ZB
OF DATA

generated from connected IoT devices by 2023, up from 18ZB in 2019²

EDGE COMPUTING WITH 5G NETWORKING

will drive a digital revolution beyond our imagination, improving how:

WHY ARE EDGE COMPUTING AND 5G CRITICAL TO ENTERPRISE SUCCESS?

Real-time insights require data to be processed near where it is created to optimize decision-making and action.

1 2

5G networks dramatically increase bandwidth, security, control and flexibility to leverage edge data even to and from connected devices and sensors on the move and in remote and hazardous locations.

EDGE SOLUTIONS

with AI-driven applications can help enterprises:

Enable new revenue streams

Redefine customer experiences

Improve process efficiency

Advance worker productivity and safety

DELL TECHNOLOGIES HAS THE EXPERIENCE, THE PORTFOLIO, THE PARTNERSHIPS AND THE GLOBAL REACH

to help you simplify your edge to generate more value where speed matters most. We help you:

Generate data-driven insights where you need them

Bring intrinsic security to the edge

Consolidate infrastructure, operations, management and data as your edge expands

Accelerate your journey to remarkable.
